Module 3:

I feel that overcoming frustration and trying things on my own will be the most difficult for me. I do not have any experience with Web Development or coding and after doing the pre work I feel that this program will be extremely difficult and frustrating for me. I tend to hesitate trying things on my own due to the fear of messing up or not being able to get it right on my own. I know that one of my weaknesses is that I am very hard on myself. I am very critical of my own work and since I am such a perfectionist, I am always looking for flaws in my own work. During this boot camp, I hope to overcome these fears and be able to successfully complete this course.
